

## INFORMATION ABOUT COOKIES USED BY OAMKFT.HU

### 1. What is a cookie?

Cookies are small files containing letters, numbers, punctuation marks and other technical characters, which are stored on the device (computer, mobile phone, tablet, smart TV etc.) when visiting certain websites. These are information technology data assisting the use of the websites that are sent to the user's browser by the web server, the browser stores these on the user's device and sends them back to the server when it receives a query in this regard. They do not contain executable files, viruses and spyware, and they cannot access the data on the hard drive either.

Cookies generally contain the following: the domain name of the visited website (the web access address typed in the browser), the retention period of the cookie and the stored information. Amongst other uses, cookies allow the recognition of the user's device and browser, so they facilitate the display of content customised to the visitor's requirements and the basic browsing functionality (e.g. provision of continuous sessions). They also support the preparation of visitor statistics while the user remains anonymous.

There is no data stored in cookies that are suitable for personal identification, but encrypted information derived from these are used for improving user experience. For example, these facilitate finding and repairing errors or help us determine associated products within your interests that we would like to highlight to you when browsing our websites.

If you, with your express consent, contact us in the future through a form, where we use cookies, it is possible that through these cookies, we become aware of information regarding the websites you visited before or the websites you visit after using the form. It happens for the purpose of improving user experience.

If you accepted the cookie notice on our websites, the notice is not displayed again until you delete the cookies in the settings of the browser (chapter 6 provides assistance in this).

If you share any content from oamkft.hu on a social networking site (e.g. on Facebook, YouTube, Instagram), you may receive further cookies from these websites. These cookies are not managed by the oamkft.hu website, so we recommend visiting the third party website for further information regarding these and their management.

### 2. Categories of cookies used on the site.

#### 2.1. Session cookies

There are cookies that are essential for the operation of the website, certain functions of it and navigating on the website. In order to facilitate the customised service and login process, the system identifies the computer of the logged in User by session cookies. If the User only closes the browser window, he will still be logged in when he reopens the browser window. These cookies do not collect information about the User that would enable the identification of the User (personal data), that could be used for marketing purposes, or that would remember the other websites or webpages of websites visited by the User.

#### 2.2. Tracking cookies

In order to provide customised services to the User and to display jobs / job advertisements as relevant to his interests and requirements as possible, to increase the efficiency of the service, to analyse the visits and use of the Website (fact and duration of visiting the Website and its pages, monitoring applications), a cookie is placed on your browser and thereby on your computer, phone or other device (end-user device), and these are used if the User expressly agreed to it previously. The User may give consent by clicking on the Accept button on the banner displayed on the Website. The tracking cookie stores a randomly generated identifier, and based on this, the application stores certain User events in the database (application, viewing the advertisement, duration of the visit, keyword, location, type of device). Once the User logs into the Website, the data recorded about his activity is connected to the User.

### 2.3. Third-party cookies

Having regard to the fact that the Website partly consists of third-party modules, the User's browser downloads these from the domain of a third party (generally advertising intermediary or Facebook) and not from a (sub)domain belonging to the Company, even though third-party cookies are stored at the time of visiting the Website. Third-party cookies are returned to the third party when for example, the User views an advertisement or visits their websites. Using these cookies, the third party (for example, advertiser) can track the whole browsing history of the user in relation to websites that contain the modules of the third party (e.g. advertising module, advertisements).

### 3. Stored cookies

on the oamkft.hu website

Own cookies			
Name of cookie	Description of cookie		Retention period of cookie
cb-enabled	Cookie managing the acceptance of cookies		1 year
frontend	Monitors the guest or regular user status of the user		Session
Tracking cookies
